5 MORE REASONS TO CHOOSE SUPERNOVA...

The SuperNova USB

Choose the SuperNova USB and you've got instant magnification for any PC, in your pocket! 'Guest Mode' requires no installation and instantly delivers magnification, colours, highlights, speech, braille and more - on the go!

Connect & View

Connect a camera and SuperNova Connect & View turns your tablet, laptop or desktop into a lightweight, portable video magnifier.

Scan & Read

Unlike other solutions, SuperNova includes OCR so you can scan and read your post, packaging and so much more.

Intuitive Touchscreen Magnification

The best touchscreen magnification that works just as your fingers expect it to!

1000s of Accessible Books

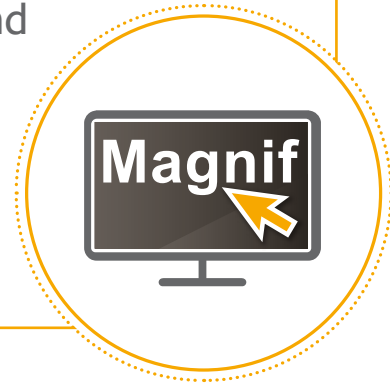

Enjoy direct access to your favourite accessible book and newspaper libraries, including RNIB Newsagent and Bookshare®.

AVAILABLE IN 3 EDITIONS TO SUIT YOUR SIGHT:

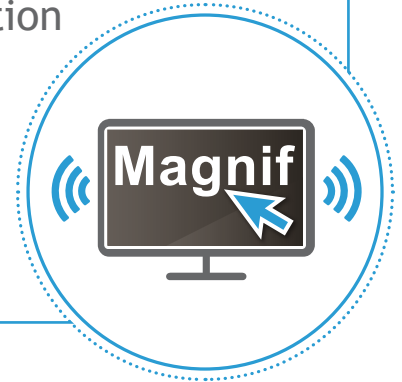

No matter what your eye condition, SuperNova Magnifier makes everything crystal clear and easy to read. Enlarge text and images to exactly the size you need. Enhance contrast with a colour scheme and highlights that perfectly suit you. Zoom in to see the detail and experience the best touchscreen magnification, or multi-task with magnification on two or more monitors.

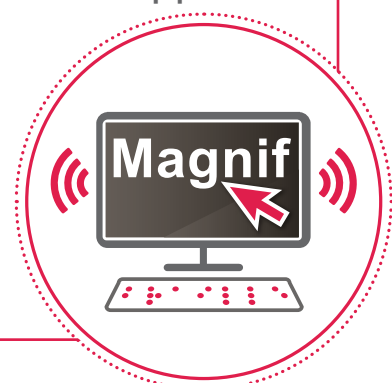

Add speech and boost your productivity with SuperNova Magnifier & Speech - ideal for tired eyes. Switch on the human sounding speech and hear the detail as you type, following the magnification on screen.

There's no need to struggle on 'busy' web pages or long documents. Switch on the speech and listen at the touch of a button. Sit back and let SuperNova take the strain.

If your sight varies through the day, over time or depending on the task, SuperNova Magnifier & Screen Reader is completely flexible to support your sight changes. Boost accuracy with a full screen reader that announces as much detail as you need. Hear spelling, style and formatting information; ensuring your documents and emails always give the best impression. Braille readers also benefit from support for the widest range of braille displays.
