**St** Adobe Stock

Millions of assets. One simple plan.

Keep your creative team inspired with access to millions of graphics, photos and images—right inside their Adobe Creative Cloud apps. And with a single subscription, it's even easier to manage.

Add assets to your projects without leaving your apps.
Adobe Stock is built right into Creative Cloud desktop apps like Adobe Photoshop CC, Illustrator CC, and InDesign CC. Your team can get up to 10x productivity gains by browsing, testing, and purchasing assets without leaving their favorite apps. And they can easily convert watermarked assets to licensed assets as they work.
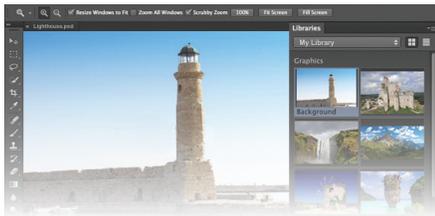

Browse an extensive marketplace.
Adobe Stock offers stunning graphics, photos, and images—so your team can always find just the right asset for any creative project.

Foster team collaboration.
Everyone on your team can license and share images from the same Adobe Stock subscription. This makes it easy to collaborate and instantly access their assets across desktop and mobile. Plus, each licensed image can be used by up to 10 team members at no extra cost.

Streamline software management.
For one flat subscription, your entire team can use Adobe Stock. And you can purchase, manage, and renew your subscription through the same Admin Console you already use to manage Creative Cloud for teams. And with team pooling, there are no extra charges for additional users.

Get the best value for your team.
Adobe Stock offers the industry's most competitive price for teams. You need only one subscription for all your team members—and everyone can access the image license pool under that subscription. And with the 10 images per month plan, your team can even roll over unused images for up to a year.
