SOPHOS

Security made simple.

What's New in Phish Threat 2.0

The latest version of Sophos Phish Threat contains a number of new features to enhance security awareness training.

Highlights in version 2.0

‣ **Comprehensive reporting.** Measure and report on overall risk levels across the entire user group with live 'Awareness Factor' data.

‣ **Baseline testing.** Discover your organization's overall susceptibility to attacks with a baseline phishing simulation that identifies phishing-susceptible users.

‣ **Multi-language attack simulations.** Test users with a wide range of simulated phishing attack emails covering the latest real-world tactics in English, Spanish, French, German, Italian, Brazilian Portuguese, Japanese, Korean, and Traditional Chinese.

‣ **Interactive training courses.** We all learn differently, which is why the Phish Threat training courses use a range of engaging training module formats such as video, multiple choice, and even games.

‣ **One-click risky user campaign enrollment.** Assign additional training to phishing-susceptible users in seconds.

‣ **ROI reporting.** Measure performance and susceptibility to attack by campaign, individual as well as at the organizational level to demonstrate return on investment across the business.

‣ **Active Directory sync.** Get started and add new users quickly and simply.

‣ **Full Sophos Central integration.** Phish Threat is fully integrated with the Sophos Central security platform, utilizing the Sophos Central global user list for simplified management.
