

My Cloud Portal

My Cloud Portal is an end customer self-service portal, that enables you to:

- + Order new subscriptions
- + Manage existing subscriptions
- + Analyse usage
- + Set budgets
- + Regularly change subscription levels
- + Manage user permissions

My Cloud Portal – Provisioning new offers

Search, filter and provision new offers from the catalog

View additional product information including features and requirements

The screenshot displays the 'My Cloud Portal' interface. At the top, a navigation bar includes links for 'My Subscriptions', 'My Catalog' (which is active), 'Manage Users', and 'Contact MSP'. Below this, a teal header bar reads 'My Catalog'. The main content area shows a list of available offers, with the first one being 'Microsoft 365 Business Standard [previous version]'. A modal window titled 'Purchase a subscription' is open over this offer. Inside the modal, users are prompted to 'Choose the number of seats you want to purchase', with a dropdown menu currently set to '1'. Below this, a green box displays the 'Total per Month : 9,41 €'. A checkbox for 'I hereby accept all the terms of the end-user service agreement' is present and unchecked. At the bottom of the modal are 'Cancel' and 'Purchase' buttons. The background catalog view includes a search bar, an 'Apply filters' button, a 'Show 40 entries' dropdown, and a 'Usage base' section showing '0,00 € per Month'. Product cards for Microsoft 365 and another service are visible at the bottom of the catalog.
