

ClaroRead is for supporting reading and writing.

ClaroRead can speak practically any on-screen text out loud, and is perfectly integrated with Microsoft Word. With ClaroRead Plus and Pro, scanned books and documents are read back with complete clarity.

A wide range of visual tools are included to colour, highlight, and focus on text as it is spoken by the computer. ClaroRead improves written accuracy with an enhanced spell check, homophone check, thesaurus and speaking dictionary. Words can also be spoken back as they are typed.

ClaroRead is easily customised to suit individual needs – making it the ideal companion for learning and working.

## Read With High-Quality Voices

ClaroRead includes high-quality voices that read anything from the PC clearly and accurately. Read in a web browser, email, PDF, Microsoft Word, OpenOffice and more.

With powerful highlighting features in Word and Adobe Reader ClaroRead can help users follow what's being read on screen.

Save the spoken text as an audio file for listening to later.

## Advanced Spelling Support

With the advanced speaking spellcheck hear the suggestions and choose the right word with confidence. Spell check in any PC application with the Check Anywhere feature, while the dictionary tooltip retrieves definitions and translations for any word, anywhere on the screen.

Homophones are automatically highlighted and can be easily checked. Special common misspellings are built in along with dictionary definitions. The speaking dictionary allows users to check words anywhere, including Word documents and web pages.

## Scan Paper Documents And PDFs

ClaroRead Plus and Pro include powerful Optical Character Recognition (OCR) technology that easily converts any PDF, textbook, photocopy or handout into an accessible format. Accessible PDFs can be created identical to the original document. Any on-screen text can be copied and scanned with OCR, then edited or read back. Scan directly from the screen to access eBooks and web content.

ClaroRead gives me access to a variety of reading materials, and it gives people the facility to manage whatever reading they have to do. It can make a real positive difference to a dyslexic student's life.

Jack Bow, Dyslexia support tutor and dyslexic person, London Metropolitan University

## Writing Support

Word prediction learns as you type. Build multiple prediction dictionaries for different subject areas. Integrated reference dictionary and prediction dictionary with add-on dictionaries targeting specific subjects. Prediction supports 'phonetic' spellings and has a powerful 'match anywhere' feature as well as the traditional 'completion' mode.

## Reading And Colour Support Tools

Included in ClaroRead are our reading, colour support and study tools.

ScreenRuler software provides a strip or ruler across the screen, which can change the contrast and have the background greyed, coloured or dimmed out, or tint the whole screen to make it easier to read.

ClaroIdeas, included with ClaroRead for PC, is our easy to use, powerful and fresh visual software solution for assisting with research, planning, outlining, studying and presenting.

ClaroCapture allows users to capture images and text from web pages and documents to help write essays and organise references.
