

A1 Email Archiving

Improved compliance, e-discovery, and productivity

Email touches every link on your company’s value chain, and the value of this content is immeasurable. Unfortunately the costs and burdens of email archiving – especially using legacy, premises-based systems – can spiral out of control.

Organizations need a solution that delivers security, integrity, scalability, and simplified management. Mimecast Email Archiving offers a true, cloud-based SaaS solution with the integrity and robust features needed to meet the most demanding information management needs. Recognized as a “Leader” in the 2016 Gartner Magic Quadrant for Enterprise Information Archiving, and a “Top Player” for Archiving in the Radicati Group’s 2017 Information Archiving Market Quadrant, Mimecast offers comprehensive email archiving to serve both corporate governance and workflow efficiency goals.

Archiving to Serve 21st Century Business Needs

Using multiple collection points – including the journal, gateway and synchronization technologies – Mimecast retains the original email, detailed metadata (including email recipients and delivery date and time), and a copy of the email if it was changed by company policy enforcement. Flexible e-discovery tools let administrators respond quickly to litigation or other requests. With Mimecast Email Archiving, organizations benefit from an independent, verifiable long-term repository that meets best practices for strict information governance. Email content – whether on premises or in the cloud – is protected against human error, malice, or technical failure.

KEY BENEFITS:

- Instant protection for valuable intellectual property assets.
- Comprehensive regulatory, e-discovery and litigation support through compliance-driven chains of custody and fully indexed archive for rapid search.
- Seamless migration of live and archived email data to Office 365 and other cloud environments.
- Reduced cost and complexity through a single cloud platform and an intuitive, unified administrative console.
- User empowerment via an Outlook® add-in, Mac app and mobile apps for iPhone®, iPad®, Android®, Windows Phone® and BlackBerry® devices.
- ISO 22301 Certification, ISO 27001 Certification, and ISO 27018 Certification (global), SOC2 Type 1 Attestation (US), and HIPAA Compliance attestation (US and UK).

Simplify Control, Security & Governance

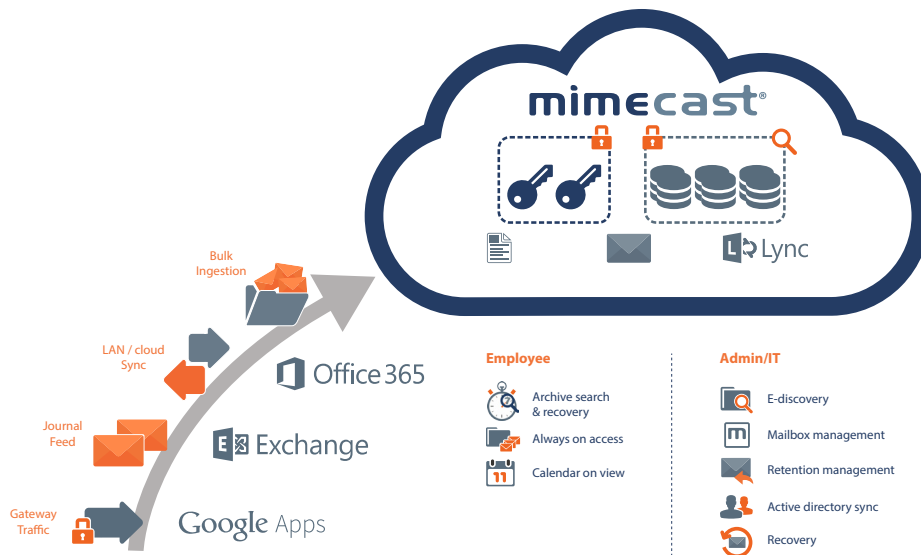

Administrators control email retention policies, with three encrypted copies stored in separate locations. Granular litigation hold, e-discovery and reporting capabilities help support compliance.

Improved Workflow Efficiency

Mimecast Email Archiving boosts employee productivity by giving them direct access to their email archives. All inbound, outbound and internal email is available for instant searching from any device with an unparalleled 7-second SLA. This functionality gives employees the means to find agreements, attachments, and other vital email content themselves, increasing their productivity without burdening the IT helpdesk.

Simplified Compliance and Risk Mitigation

The Mimecast Email Archiving service is architected on a single, purpose-built cloud platform that also enables Mimecast email security and continuity services. Mimecast's integrated services deliver compelling benefits including robust security and 100% availability, even when primary email systems are unavailable. Mimecast enables organizations to fully leverage the cloud's cost and scalability advantages without compromising control or security.

“Every one of our attorneys run Mimecast apps on their smartphones. They don't even think of it as archiving anymore. They all say, 'it's in my Mimecast.' To which I add, 'not only is it in your Mimecast, it's on your phone.'”

— **Betsy Horn, IT Director, Harris, Finley & Bogle, P.C.**

“From virtually every standpoint, Mimecast is phenomenal. The technical support is excellent, and any problems that arise are addressed quickly. Mimecast really listens to our feedback and takes our recommendations and suggestions into account. Switching to Mimecast was a great move for Mohawk.”

— **Colby Grueber, Infrastructure Director, Mohawk Industries**

Make Email Safer for Business

Mimecast integrated service bundles deliver the ultimate in cyber security, resiliency and archiving. Get comprehensive risk management or address specific requirements - all in a single platform.
