

SELF SERVICE AD GROUP MANAGEMENT

ACTIVE DIRECTORY GROUP MANAGEMENT FOR END-USERS & TEAM LEADERS

AN ENTERPRISE-CLASS GROUP MANAGEMENT SOLUTION

Make AD group changes without burdening the help desk. Empower business leaders to manage their own Active Directory groups.

- Allow non-IT leaders to manage their team's AD groups and provision new groups.
- Schedule group expiration reminders, keeping Active Directory groups current.
- Centralize AD group management in a simple, secure web portal.

MEET COMPLIANCE MANDATES

Include security protections for your Active Directory groups and Organizational Units.

- Easily add or remove group owner, groups, and members while keeping a full audit of changes.
- Create group expiration reminders to ensure group membership is still necessary.

- Stop AD groups from going stagnant by empowering team leaders with group control.
- Record audit and attestation reports.

REDUCE HELP DESK COSTS

“The average IT service desk cost per agent-handled contact in 2013 was \$17.88.” Gartner, Market Guide for Password Management Tools, June 2014.

- Reduce time spent by the help desk and expensive AD administrators.
- Provide a faster resolution to the manager or employee's request through self-service.

MITIGATE INTERNAL RISK AND EXTERNAL THREATS

Increase security by limiting info available to employees through accurate AD group membership.

- AD groups are controlled by department leaders instead of the help desk.
- Full audit logs of change activity are available to easily find and correct mistakes.

IT organizations must place user experience at the forefront of the IT self-service strategy.

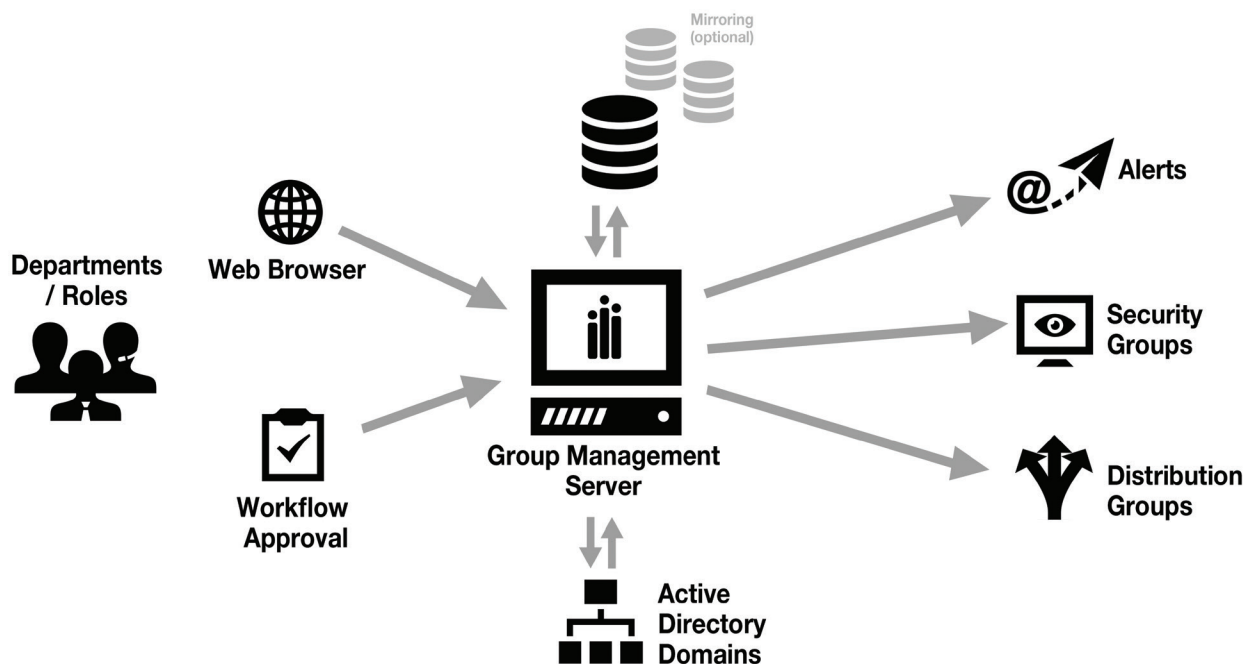

Gartner
Design IT Self-Service for the Business Consumer, February 2014

ELIMINATE ACCESS CONTROL AND GROUP ADMINISTRATION CALLS

Everything from email lists, SharePoint, file servers, third party applications and custom in-house apps all depend on Active Directory groups to determine who gets access and what they can do.

- Reduce time spent by the help desk and expensive AD administrators.
- Provide a faster resolution to manager and employee requests through self-service.
- Reduce errors by keeping responsibility with the manager.
- Easily satisfy auditor requests.

AUTOMATED MANAGEMENT

- Delegated group provisioning
- Self-service group management
- AD group display
- Group bulk operations

ENHANCED SECURITY FOR AUDITS AND COMPLIANCE

- Group membership audit
- Group security policy
- Role-Based Access Controls

SEAMLESS EXPERIENCE
