

Sibelius

The fastest, smartest, easiest way to write music

From concert halls and scoring stages, to sheet music stores and classrooms, more composers, arrangers, publishers, and educators use Sibelius®—the world's best selling notation software—than any other. And now with new Sibelius | Cloud Sharing, plus many recently added features and advancements, Sibelius makes the entire music writing, collaboration, and delivery experience even easier than ever. Whether you're composing for a live performance, media entertainment, or in the classroom, nothing empowers you to write music like Sibelius.

COMPOSE AND ARRANGE SCORES WITH EASE

Whether you're well versed in writing music notation or prefer to use a keyboard, guitar, or your voice to enter notes, creating music has never been easier. Save tons of time with unique tools such as Magnetic Layout and Dynamic Parts. Get access to over 150 plug-ins that help you edit, arrange, and clean up layouts. You can even store ideas and small snippets of music in the Ideas library for later reuse.

SHARE SCORES IN THE CLOUD

Sibelius | Cloud Sharing opens up a whole new way of working. This groundbreaking technology enables you to share scores from Sibelius to your own personal cloud space (included free), or embed scores in a webpage, and invite anyone to flip through pages and play your compositions using any computer, laptop, or mobile device. It's ideal for previewing and reviewing musical works in the studio, in the classroom, or on a sound stage.

HEAR YOUR MUSIC THE WAY YOU INTENDED

With 36 GB of professional content, including a specially recorded symphony orchestra; rock, pop, and jazz instrumentation; world-class licensed sounds; and much more, you can play back and hear every nuance of your composition in stunningly realistic detail. Plus, Espressivo 2.0 enables you to add more expressive and realistic "feel" or rhythmic swing to any part of your score.

STREAMLINE YOUR WORKFLOW

Sibelius integrates with both music and audio post workflows. Compose themes in the software, then move your composition to Pro Tools® to build cues to picture. Share scores with collaborators and musicians in the cloud, printed on sheet music, through MusicXML, or on an iPad running Avid Scorch®. And easily communicate changes and feedback using annotations.

LAYOUT, EXPORT, AND PRINT

Create beautiful, professional-looking scores easily using a full accompaniment of desktop publishing tools. Colorize notes. Customize staff sizes. Perfect text with tracking, leading, and other typography tools. Add graphics using drag-and-drop. When finished, you can easily export publisher-quality scores as PDFs with just one click.

TRANSCRIBE AND SCAN MUSIC RIGHT INTO SIBELIUS

Sibelius comes bundled with Neuratron AudioScore Lite and PhotoScore & NotateMe Lite, enabling you to transcribe and scan music into Sibelius. With AudioScore Lite, you can input notes into Sibelius by singing or playing an instrument, or importing music from a CD. With PhotoScore & NotateMe Lite, you can scan printed and handwritten music and send to Sibelius for playback, transposing, and editing. You can even draw music notation with your finger or Surface Pro Pen and see it convert to notation instantly.

PUBLISH INTERACTIVE SCORES

Only Sibelius offers a complete end-to-end workflow that takes you from initial idea to publishing and selling music online. Sibelius | Cloud Publishing technology enhances the sheet music shopping experience, enabling your customers to view, play, change instruments, and transpose your music on any device before buying—without requiring a plug-in—and then print a high-quality version of the score once they do.

TEACH MUSIC COMPOSITION

Sibelius is ideal for teaching music notation, composition, and theory to students of all ages. It includes over 1,700 ready-made teaching materials, including worksheets, projects, and exercises, as well as a Classroom Control window to track and freeze your students' progress. In addition, Sibelius network licensing makes it easy to assign licenses to students on any computer—even their own.

WHAT'S INCLUDED WITH SIBELIUS

- Sibelius perpetual or subscription license with download access to:
 - Sibelius software
 - 36 GB Sibelius Sounds library
 - 1 GB free cloud space for Sibelius | Cloud Sharing
 - AudioScore Lite audio transcribing software
 - PhotoScore & NotateMe Lite music scanning software
 - ReWire audio/data transfer software
- Avid Upgrade and Support Plan (includes all new releases for 12 months with a perpetual license purchase or throughout an active subscription)

Sibelius is available as a software download—a DVD Media Pack is also available for purchase from our online store or from one of our resellers. An Internet connection is required for software activation and for downloading the installers. A high-speed Internet connection is highly recommended for downloading Sibelius and the Sibelius Sounds library.

NETWORK LICENSES

Sibelius's network licenses operate on a client-server model. The Sibelius program itself is installed on the local hard drive of each of the client workstations, and a separate License Server program is installed on a single designated server or workstation. The License Server program is supplied with your copy of Sibelius and enables the designated number of licensed client copies to run on the network simultaneously. In conjunction with Sibelius's Classroom Control feature, the License Server also lets you send messages to users of the client copies, send and receive Sibelius files between client machines, and close copies down from the server machine.

LICENSE SERVER REQUIREMENTS

Sibelius requires a network using the TCP/IP and UDP protocols. (Your network may use other protocols in addition to TCP/IP and UDP, but TCP/IP and UDP must be present in order for the License Server to communicate fully with the client copies.)

Add comments and feedback directly to parts of a score with the Annotate feature.
