

Fishbone

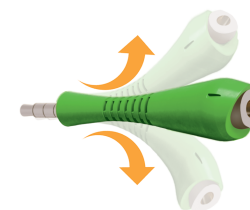

Accessories

PLUG TYPE	Single 3.5mm TRRS
PIN MATERIAL	Brass Alloy with nickel plated finish
WEIGHT	6.1 gm
PACKING	500 pieces per carton

ITEM# 5ADP-FISHBO-NE

Flex-and-Bend Design

Reduce Pin Breakage and Protect Your Equipment!

2017 ISTE Best of Show, the Fishbone TRRS breakaway adapter is AVID's response to the pin breakage problem experienced across the audio industry. Inspired by the swimming motion of fish, the AVID flex-and-bend design reorients the Fishbone's jack in the direction of the pulling force. Allowing the device pin to disengage without causing damage. Preventing pin breakage inside expensive electronic devices is a must have for classrooms.

The Fishbone is another result of AVID's focus to reduce technology failure for educators and students, while enhancing the learning experience.

Benefits

- Equipment Protection
- Affordable Solution to a Costly Problem
- Durable and Dependable
- Perfect for Students of All Ages

COMPLIANCE
