

Impero EdProtect is our comprehensive cloud-based capture management module for online safety in education. It identifies potential warning signs of at-risk behaviour across all digital activity, so you have visibility of what your students are viewing, accessing or creating online. Designed in response to Keeping Children Safe in Education and school inspectorates (such as Ofsted and ISI), **Impero EdProtect** helps schools to adopt a best practice approach to online safety.

The key features

Keyword detection

Identifying key words, phrases, abbreviations or acronyms (typed or viewed online) and capturing the incident to help pinpoint vulnerable students potentially engaged in at-risk behaviour.

Keyword detection libraries

Utilising regularly updated keyword libraries, developed in partnership with a number of charities and specialist organisations, to flag concerns and provide definitions relating to a broad range of safeguarding issues.

Customised keyword policies

Empowering schools to add their own terms to detect content in relation to their own individual challenges, whether specific incidents, pupil names and/or gang references, as well as local terminology.

Context analysis

Taking a screenshot or video recording with each keyword capture, helping to provide context and 'who, what, where and when' information, invaluable when triaging incidents.

Capture management

Providing a historic log of all online activity, including screenshot and video captures, with incident handling and reporting tools to evidence safeguarding risks, which can be shared with external agencies where necessary.

Enforce acceptable use policies

Reminding students how to behave responsibly online by enforcing acceptable use policies and running reports to measure their efficacy, while supporting GDPR responsibilities through verifiable consent.

Anonymous student reporting

Enabling students to report pastoral concerns (anonymously if they choose) about themselves or another student to a trusted member of staff.

Teacher alerts

Alerting teaching staff in real time when a keyword capture is triggered in their classroom so they can address the issue as it happens.

Reporting and analytics

Displaying all online safety data down to a granular level and producing detailed reports for the relevant members of staff to review and analyse.

The key benefits

Provide contextual insight

By providing the context to any keyword captures (with a screenshot or video recording), staff members can deal with incidents quickly and effectively, identifying potential patterns of at-risk behaviour.

Promote good digital citizenship

Empowering young people to navigate the digital world safely and responsibly, by educating them on risk and appropriate behaviour, so they will make the right decisions whether in or out of the school's digital environment.

Keep students safe

Adopting both a proactive and reactive approach to online safety, **Impero EdProtect** detects early warning signs so that school staff can intervene in potentially high-risk situations promptly and before they escalate.

Support best practice

Developed in line with Ofsted's 'whole school' best practice approach to online safety, **Impero EdProtect** involves the whole school community and alerts the relevant staff members to incidents as they occur.

Educate safeguarding staff

Working with specialist organisations, industry experts and charities, **Impero EdProtect's** keyword libraries include detailed definitions and severity ratings. This helps to inform and guide staff members when they are alerted to a keyword capture.

Help fulfil legal obligations

Designed in response to UK government statutory guidance, including the Prevent Duty and the Department for Education's Keeping Children Safe in Education guidance, **Impero EdProtect** helps schools to fulfil their legal duty of care.

impero
education pro

As part of Impero Education Pro

Impero EdProtect can be purchased standalone or as part of the **Impero Education Pro** suite, for a more comprehensive approach to device monitoring and management. Deployed as part of **Impero Education Pro**, **Impero EdProtect** fully integrates with **Impero EdTeach** and **Impero EdAdmin** so that classroom control and network management can be delivered with student safety at the core.

impero
ed aware 

Integrate with Impero EdAware

Using **Impero EdProtect** alongside **Impero EdAware** provides a holistic approach to managing safeguarding incidents and risk indicators – whether they occur in the physical world, the digital, or both. Risk often manifests in the online world long before it becomes an issue in the physical world – with **Impero EdAware** and **Impero EdProtect** integration, these warning signs can be detected early.
