

# Canolfan Cymunedol Mynach Community Centre

Empowering the local community with an innovative, modern meeting space

**Canolfan Cymunedol Mynach Community Centre, located in Devil's Bridge, Ceredigion, has recently undergone a major interior and exterior redevelopment project, transforming it into a modern community hub for the benefit of local community groups and local residents.**

It has been an absolute pleasure working locally with Canolfan Cymunedol Mynach Community Centre to support them on their digital transformation journey and adoption of their modern meeting space.

The Centre recently approached us with initial ideas of installing video conferencing facilities at their beautiful, historic chapel building in Devil's Bridge, Ceredigion, which they have recently renovated to a very high standard. Pugh's IT Manager Elfed Jenkins worked closely with them to gather and understand their full set of requirements before providing a live demonstration of Pugh's own modern meeting room at our Llanon headquarters.

The Centre were very impressed upon seeing how fast and easy it was to host and join hybrid online meetings using Microsoft Teams and Zoom. A large, height adjustable SMART interactive board allows all participants to be seen and heard, even when sat at the back of the hall or when joining remotely. The best-in-class board can also be used for presentations, and as a touchscreen, it transforms into a digital whiteboard for writing and real-time annotations. The large screen is also ideal for their plans to engage with the local community by hosting movie nights and various other events.

## Helping people connect and engage, no matter where they are

An industry-leading, high-quality Yealink camera provides remote participants with a clear view of the room and all the in-person attendees, allowing everybody to connect, engage and feel valued, regardless of whether they are there in person, connecting from home or on the go. The Centre's new meeting space also allows them to run various classes for a mixture of in-person and remote members, and allows clubs from across the UK, and even worldwide, to be brought together.

Plus, this high-quality, flexible modern meeting experience provides the additional benefits of savings in travel costs and time, as well as reducing environmental impact.

---

## Cutting-edge technology accessible to the local community

At Pugh, we take great pride in supporting the local community and it was fantastic to get involved in a project that will have such a positive impact for so many of the local community groups who make use of the Centre's facilities, including Merched y Wawr, YFC and the local Community Council. The Centre were also very happy to have been provided all services through the Welsh language, from the initial meetings, to the live demonstrations, through to the installation and Elfed's training.
